DETAILED ACTION

Response to Arguments

1. Applicant's arguments, see Amendment, filed 8/28/09, with respect to claims 1-20 have been fully considered and are persuasive. The previous rejection has been withdrawn.

Allowable Subject Matter

2. Claims 1-20 are allowed.

3. The following is an examiner's statement of reasons for allowance: None of prior art discloses or suggests a cell search comprises a first correlation arrangement that correlates for a primary synchronization code in a received signal to produce a first correlated signal; a second correlation arrangement that correlates for a secondary synchronization code in the received signal to produce a second correlated signal, the secondary synchronization code being different than the primary synchronization code; and logic that derives a frequency adjustment signal from the first correlated signal and combines the frequency adjustment signal with the second correlated signal to reduce a frequency offset in the second correlated signal such that a secondary synchronization channel of a cell is acquired in the cell search block.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
